FASHION À LA **Modesitt**

Annie Modesitt, aka the "knitting heretic," talks about her next pattern book, her new online classes, and why she put down her needles for a decade before launching her popular blog.

-- By Leslie T. O'Neill

nnie Modesitt laughingly calls herself a "knitting heretic." a nickname she took on when she self-published a book about her unorthodox knitting techniques. It's a name that suits the adventurous designer, prolific author, outspoken blogger, and enthusiastic teacher. Annie is a woman of passion and honesty, a designer unafraid to voice her controversial ideas about knitting in an industry steeped in tradition. It's hard to imagine that with all her success-she's written seven knitting books, contributed to more than 10 pattern books, published designs in all of the major knitting magazines, and taught around the world-it almost did not happen.

Annie says that in 1983, "I figured out my own way of knitting, I didn't know I was doing anything different." It wasn't until she began working as a technical writer for another magazine that she discovered she knitted differently from everyone around her. This eventually became so frustrating that she set down her knitting, enrolled in grad school, and built a career in theatrical and TV design. She didn't pick up her needles once in 10 years, jeck up her needles once in 10 years,

Then, in 2000, she read an article by Priscilla Gibson-Roberts that, as she happily declares, changed her

life. She learned that combination knitting is an accepted method, common among Eastern European knitters.

"I started crying because I felt so legitimized and wildsted," remembers Annie. In fact, she was inspired to begin designing knitwear again and felt empowered to teach her style of combination hitting, which merges techniques from Western and Eastern knitting methods. Right now, she's focusing pheth book. History on two Needles Cooperations, in the control of the control of the book. History on the Needles Cooperation of the control of and developing a series of online lanting classes.

Annie's background in historical design (she earned an MFA in costume and set design from Rutgers University) as well as her fascination with paintings from the British National Portrait Gallery have both served as endless inspiration for the new book's garments. "In History on Two Needles, I take images from history, paintings, sculptures, even a funeral effigy from Canterbury Cathedral to make modern knit designs you wouldn't be ashamed to walk down the street in-garments that look modern, but have a historical basis," she says. "The way the sleeve is draped, maybe, resonates with the original inspiration." As with all of her designs, Annie emphasizes the wearability of these garments.

considers the knitter's experience as she carefully works
out the pattern for her designs,
looking for ways to make it as much fun as
possible to knit. 'I want to encourage knitters to be adventurous and to understand
how good they can be. Being a really good
knitter doesn't take a lot of time—it just
takes passion and lowe." asserts the self-

taught designer.

Annie's connection with knitters is a two-way relationship, one that she has actively cultivated through her popular blog, www.modeknit.com. What began as a knitting blog in 2002 has since evolved into a personal dialogue with her readers about Annie's design process as well as her family's trails and tribulations.

"The blog is useful for working on a new piece. Readers will make me think about it in different ways, and it really keeps me going. I post images of a work in progress and ask readers for opinions. I get really great feedback. I have such intelligent readers," Annie says.

Annie especially credits her blog readers for both their encouragement and input on her patterns for History on Two Needles. She's been working on the book for three years, slowed down in part by the chronic pain and exhaustion caused by fibromyalgia, which was diagnosed in December 2009. This didn't prevent her from creating online classes at www. knittingheretic.com that draw on her 12 years of teaching experience, including classes like Lace Bootcamp and Combo Knit, which

introduces her signature style of combination kmitting,
"With a purl stitch, I wrap yarn opposite to how most people wrap it, so it's mounted different for the kint sitch," she replains.
"With combo kmitting, most movement comes from the fingers and shoulders," She uses her stock of illustrations and class hand-stock and the stock of illustrations are stock of illustrations and the stock of illustrations are stock of illustrations and the stock of illustrations are stock of illustrations and the stock of illustrations are stock of illustrations and the stock of illustrations are stock of illustrations and the stock of illustrations are stock of illustrations and the stock of illustrations are stock of illustrations and the stoc

to teach her classes. She also uses online

chats and email to work individually with students at their own pace. "When I teach combo knitting classes, my goal isn't to change the way they knit, but to open up a new way to knit more easily and to understand the architecture of knitting. Hopefully they become more intuitive and can get themselves out of any situation they get into as knitters," explains Annie. It's a lesson she's learned and passes on to her students to build their

confidence because, as she

puts it, "We knit to make

ourselves happy." *

What is duplicate stitch, and can I substitute it for patterns calling for intarsia?

Duplicate stitch is an easy embroidery technique to trace a stitch with a different color varn threaded on a varn needle. Because you're covering up the original stitch, it looks as though you knit that stitch in a different color (see bottom photo, right).

While you can substitute duplicate stitch for intarsia. you would not want to use it over large fields of color. Duplicate stitch is better used over small areas (for example, single-stitch accents or outlines around another area of intarsia). If you use duplicate stitch over a large area, you run the risk of making areas of your project stiff and unvielding. Twice the yarn equals twice the weight, which can pull and distort the design. Better to save it for small accents.

It's easy to do, Follow the path of the stitch using a blunt varn needle. Avoid a sharp needle, which can easily split the yarn. Come up from the back side of your work (see photo 1),

and follow the V line of the stitch you are going over, then insert your needle back through to the wrong side, and bring it forward again. Then follow the V back down and insert the needle once more to the back (see photo 2). Repeat as needed. Remember to keep your tails long enough to weave in!

What is the best way to join a new ball of yarn at the beginning of a row?

That's a very good question, Christel, and asking it suggests that you understand the first rule of thumb-avoiding switching balls of yarn mid-row, if at all possible.

It's important to accurately gauge how much yarn you have left in your current ball. Because varn winds its way across a row, you need to multiply the width of your row by 3. You'll require that amount of varn to complete one row (for example, you'll need at least 1 yard-36 inches-to finish a 12-inchwide row).

The second rule of thumb is to avoid knotting your new yarn and the old. Knots inevitably have a way of making their way to the front of your work, are unstable, and don't hold up well over time.

When I join a new ball. I place my needle into the next stitch, dropping the old varn (being certain to leave at least a 4-inch tail), wrapping the new yarn around the needle as if I had already

completing the stitch. You can snug up the last stitch of the old yarn and the first stitch of the new yarn by gently tugging on the tails of the new and old yarns and then tying them in a loose bow. You'll untit the bow later and weave in the ends with a yarn needle. If color changes aren't

been knitting with it, and

If cotor changes aren't an issue, and the edges will be visible, I typically like to wait until 1.5 to 2 inches into the row before doing my ayrn change. I wrap the yarn in a similar fashion, loosely tying the ends together, and then I remove the knot later. By switching yarns at least an inch into the row, there's room to weave in the tail of the old and the new yarn in opposite directions and make it less obvious from the front.

If you're knitting a striped scarf, for example, where you'll use the color again within an inch or so, you can leave the ball attached and wrap the new yarn around the old yarn (see photo 1, above), securing the old yarn as you go until you need it again. You will be able to see the yarn if you look carefully (see photo 2), but there will be fewer ends to weave in, and they can also be visible.

Q have read about using two circular needles instead of double-pointed needles. I hate DPNs. What's the scoop?

A Shhh, Abra, don't tell anyone, but I hate double-pointed needles, too! You can bypass DPNs with ease. The length of the second circular needle isn't.

important; just make sure it's the same size.

the same size.

To switch from one circular to two, simply knit half the stitches onto the new circular needle. You'll then knit the stitches on circular needle #1 with the needles of circular #2 and the stitches on circular #2. When you're working with circular #1, the needles of circular #2 of #2 hang loose and vice.

of #2 hang loose and vice versa. It's as simple as that! It's tempting to start your new circular needle at the beginning of a new round. To avoid losing my stitch marker every time I move from one circular to another, however, I typically start the new needle an inch or so past the beginning of a round.

If you're working on a pattern that refers to specific double-pointed needles (for example, "knit chart A on needles 3 and 4"), you'll need to divide the stitches on your 2 circulars appropriately, and you may find that stitch markers are handy to help you keep track of your stitches according to the pattern's instructions.

Need the First Twelve Patterns?

PLIL KNITTER'S NOTEBOOK: FELTING

Overcome your feor of felting with best practices from Felt It! and

TAKE THE Felt Forward author Magaie Pace.

elting involves washing a knit item with the intent to shrink it. Think Shrinky Dinks for knitters. Felting can be fearinducing-plunging a week's worth of knitting into a washing machine is, to say the least, a nail-biter. With a regular knitting project, you can adjust needle size to gauge and alter patterns to fit. Such fine-tuning is a luxury for felters. You need courage to throw your labor of love into the washing machine. So if you've got the moxie, try it out with these tips,

Choose the Right Yarn Use varn made of 100 percent animal fiber or animal fiber blends. Make sure it's an untreated varn, one that isn't blended with a synthetic and treated to be machine washable (aka "superwash"). Yarns shrink at different

speeds, so swatch each yarn and each color you're using. Light or white yarn, for instance, can felt poorly because varn companies use bleach during the manufacturing process. Our before and after photos on the next page, showing the Makeup Case on page 38, are prime examples of how the same yarn in a different color can produce different results under the same conditions and why swatching is essential.

Start With a Felting Pattern

Since knit items shrink considerably more in length than width, unfelted pieces barely resemble the finished item. Use a pattern written specifically for felted items until you've got some experience and are ready to start experimenting. And try small items to get a feel for the process. The projects starting on page 36 are perfect for beginners ready to get their yarn wet.

Prep Your Project

Before starting the felting process, check for holes and dropped stitches. and weave in ends carefully so they won't come undone during felting. Place your knitted project to be felted into a mesh laundry bag or a pillowcase and zip or knot the bag shut.

Before you submerge your knit, it's helpful to understand how the fibers will act once in the water. All feltable varns shrink differently, but most follow these general rules:

- The piece will felt more quickly if there is more ogitation. If you determine from the swatching process that your project is slow to felt, odd jeans to the wash. Stay away from towels, however. They can shed and leave lint embedded in the felted fabric.
- Your project will get bigger before it aets smaller. When knitted wool is wet, it stretches. It's only ofter the agitation begins in earnest that the barbs in the wool heain to intertock ond the piece begins to shrink.
- Once the stitches stort to disappear. the piece will shrink more ropidly.

Get Your Knit Wet

Felting occurs with the right combination of fibers, heat, and friction. Use a top-loading washing machine and a cycle that combines the hottest water, the least amount of water, and the most agitation. In the case of most machines, this will be a small or normal wash in hot water. It doesn't matter what the rinse temperature is because you don't get that far in the wash cycle.

After you've thrown your pieces into the water, it may take only a few minutes for your project to show signs of shrinkage. When it does, you must be vigilant. Check your project at least every 1 or 2 minutes. Once a project starts to felt, it can shrink rapidly, and it's very easy to over-shrink a piece. Your swatches may help guide you. but you'd be surprised how a project can take on a life of its own!

You'll know it has finished felting

- There is no stitch definition.
 - + It's stiff
 - It reflects the finished measurements of the pattern you're working on.

If the agitation cycle is complete and your pieces still haven't felted, manually reset your machine to go through the agitation cycle again. Don't let it go through the spin and subsequent rinse cycle. When complete, remove all the pieces from the machine and rinse them in the sink. Squeeze out the excess water

Swatch This!

The same yarn, but in a different color, can produce radically different results under the same circumstances.

A more refined finish

until no water comes out. The Makeup Case needs to be damp, not wet, to shape it.

Get in Shape

Shaping your project can be as simple as squaring off corners and pulling it into a perfect rectangle if it's a bag or, in the case of the Plant Cozies on page 36, pulling the felted cozy over the flowerpot you want it to cover. You may need to get creative. The Floral Accessory on page 37 was left to dry inside a small measuring cup to sculpt it into the shape of a flower. Make sure to let your project dry completely, however, before appliqueing or

embellishing.

Felting can be remarkably forgiving because it doesn't discriminate against uneven knitting or inconsistent tension. As long as you respect the process, you'll find that with some experience, you can take on bigger projects, more complex techniques, and more elaborate shapes. «

*GUIDELINES ONLY. The above reflect the most commonly used gauges and needle or hook sizes for specific varnicategories.

How to Make a Pom-Pom

Cut 2 cardboard circles the diameter of your pom-pom with a small hole in the middle. Cut a slit from the outer ring to the center hole.

O Holding the 2 circles together, wrap the varn around the outer ring, making 2 layers of yarn.

When the circles are entirely covered, cut the yarn between them all the way around the outer edge and wrap a 4"-long strand of varn between the circles, pull tight, and tie a knot. This holds the short cut ends of the pom-pom together.

A Remove cardboard circles and trim off any excess strands. Use the long strands of yarn to attach the pom-pom to your project.

How to Graft a Sock Toe

Place stitches to be grafted on 2 needles with wrong sides together and points facing to the right. Thread yarn onto yarn needle and on front needle as if to purl (do not remove stitch).

needle as if to knit, leaving stitch on needle. *Insert into first stitch on front needle as if to knit, slip stitch off needle, insert into next stitch on front needle as if to purl. insert it into first stitch leave stitch on needle. Insert into first stitch on back needle as if to purl, slip stitch off needle, insert into next stitch as if to knit, leave Insert into first stitch on needle. Repeat from * stitch on back until all stitches have been grafted.

SPECIAL TECHNIQUE Duplicate Stitch

Duplicate st is a quick and simple way to add contrasting color to Stockinette st fabric using a varn needle and yarn to form Vs over already existing stitches. With the right side of the fabric facing you, insert your yarn needle from the wrong side at the point just below the V you intend to duplicate. Then thread the needle behind both legs of the V of the stitch above the stitch you are duplicating and pull the yarn through, Finally, insert your needle back through the original point of entry so that your needle is once again on the wrong side of the fabric and you have successfully duplicated the stitch. For more details on Duplicate st, see the Expert O&A on page 48.

CO71

With desired color, cast on 70 sts. Divide sts evenly around double-pointed needles, Join to work in rounds, taking care not to twist sts. Place marker for beginning of round. Rounds 1-10 * Knit. Round 20 * [Kt, kk7og] 10 times—60 sts. Rounds 12-10 * Knit. Round 20 * [Kt, k7og] 10 times—50 sts. Rounds 22-24 * Knit. Bind off.

POLKA DOTS AND TRIM Using Duplicate st and

contrasting color of yarn, add 7 Polka Dots evenly spaced around in unshaped areas of each Cozy. To work staggered line below Polka Dots, Duplicate st every other stitch, alternating stitches, for 2 rows.

Sides around edges of Crown.

Weave in ends. K

The Knitter's Guide to Hand-Dued and Variegated Yarn, gives us a peek inside her purple knitting bag, which she also made!

Mu fauarite lipstick and hand cream fram France.

Sketches for ideas calculations, reminders dondles

This ane's Left over from a recent knitting guild retreat. I'm running for guild president next year.

My Bag I made it by combining swatches, sweater pieces. trim, fabric, buttans, and embellishments. You'll notice the purple theme, that also goes for my house, clathing, and car (a '65 canuertible Mustang!)

Needles I'm a rare breed who laves straight needles and seams, sa I keep a few pair of straight wooden needles handy, ready to swatch anything. The fabric case is another handmade gift.

and schematics.

Hand-carved Rosewood Container The wood case was made far me by a student, and the prettu stitch markers are alsa handmade aifts.

A swatch for a semi-circular shawl I'm designing. I'm still working out lace ideas to get the piece to Lau flat. I really enjoy the moth and experimenting
